EXPERIENCE

Frontend Developer | Freelance

July 2024

Designed and developed websites and web applications for diverse clients including educational institutions, cryptocurrency projects, and a real estate rental platform. Provided end-to-end development services from concept to deployment.

Responsibilities:

- Developed a comprehensive real estate rental platform with advanced filtering and authorization systems, resulting in a 45% increase in user engagement;
- Created fully responsive designs for all device types, ensuring 100% accessibility across mobile platforms and tablets;
- Executed SEO optimization strategies for educational websites, generating a 30% increase in organic traffic and improved search engine rankings;

- Integrated Telegram bot functionality for automated user communication, reducing response time from 24 hours to 5 minutes;
- Configured Docker container for consistent deployment environments, streamlining the development-to-production workflow;

Technologies: React.js, Next.js 14, Tailwind CSS, Framer Motion, MongoDB, Node.js, Zustand, Telegram Bot API, Docker, REST API, OAuth2, Google Analytics.

Frontend Developer | Marketing Agency

December 2023 – July 2024

Served as frontend developer in a specialized marketing team creating high-performance landing pages and websites for cryptocurrency and meme coin projects. Led development of user engagement features and managed WordPress customizations to achieve marketing objectives.

Responsibilities:

- Implemented Telegram Bot API integration that automated user communications and increased client inquiries by 35%, significantly improving lead generation;
- Optimized page loading performance through code splitting and image optimization, improving Core Web Vitals scores from 65 to 92, enhancing SEO rankings and user experience;
- Customized WordPress themes and plugins for client marketing sites, resulting in 25% faster content updates for marketing teams;
- Collaborated with SEO specialists to implement technical optimizations that improved organic search visibility by 40% for key client projects;
- Created responsive UI designs that increased mobile conversion rates by 20% across landing pages;

Technologies: React.js, Next.js 14, Zustand, Tailwind CSS, WordPress, Telegram Bot API, Node.js, Jest, REST API, Google Analytics, SEO tools.

Frontend Developer | Lumber Sales Company

March 2023 – October 2023

Independently designed and implemented a corporate multilingual website for a lumber sales company targeting international clients. Led the entire development lifecycle from concept to deployment.

Responsibilities:

- Developed a comprehensive multilingual website supporting 4 languages, expanding the client base by 40% through successful entry into international markets;
- Implemented Sanity CMS for content management, enabling non-technical staff to update information independently and reducing update time by 75%;
- Optimized SEO through semantic structure and sitemap implementation, resulting in a 65% increase in organic traffic and improved search engine rankings;
- Ensured full responsiveness for mobile devices, enhancing mobile user conversion rates by 25% and providing a consistent experience across all platforms;

Technologies: React.js, Next.js, i18n, EmailJS, CMS Sanity, HTML5, CSS3, JavaScript.

Frontend Developer | Automotive CRM Platform

February 2020 – May 2022

Worked in a development team creating an integrated platform for automotive service management. Contributed to the design, development, and optimization of user interfaces and data visualization components.

Responsibilities:

- Progressed from HTML/CSS developer to full-fledged React developer within the first year, demonstrating rapid skill acquisition and professional growth;

- Engineered an interactive interface for service analytics visualization using D3.js, improving data comprehension by 50% and enabling more informed business decisions;
- Collaborated effectively in a team of 7 developers using Agile methodology, ensuring consistent delivery of high-quality features on schedule;

Technologies: React.js, Redux Toolkit, React Router, D3.js, HTML5, CSS3, JavaScript.
